Extended forecast – Scattered showers early Friday morning will turn isolated by 8am. Precipitation should remain an isolated coverage through the early afternoon before turning scattered once again by late afternoon. A few passing showers are possible Saturday amid windy conditions. Scattered areas of rain Sunday morning should become widespread by midday and will persist through the afternoon. Winds are slated to increase further and turn east-northeasterly on Sunday, with anticipated gusts of 40 mph or greater. This wet and windy pattern will persist into Monday, with thunderstorms additionally possible during the morning.

Forecast prepared by meteorologist Joe Halvorson.
